
Application Notes Silego Technology

programmable mixed-signal matrix devices - programmable mixed-signal matrix devices greenpak (gpak), a member of silego technology's cmic (configurable mixed-signal ic) products, is a cost effective one-time nvm programmable mixed-signal matrix device which enables innovators to integrate many system functions while minimizing component count, board space, and power consumption. **slg3sy3952 - digi-key** - datasheets and errata, application notes and example designs, user guides, and hardware support documents and the latest software releases are available at the silego website or can be requested directly at info@silego.com. for specific greenpak design or applications questions and support please send e-mail requests to greenpak@silego.com **1 hz interrupt generator - digi-key** - datasheets and errata, application notes and example designs, user guides, and hardware support documents and the latest software releases are available at the silego website or can be requested directly at info@silego.com. **greenpak universal dev. board 1 press "program" button to ...** - press "program" button to program chip. greenpak universal dev. board 1 can be used as test fixture to easily verify your design functionality. to enable test board mode click "test mode" button. if "test board" button becomes orange the schematics in greenpak emulation tool window represents the actual state of the development **intel® quark™ se microcontroller c1000 power sequencing ...** - february 2017 002 silego part number updated (new specific part number for atp1). ... 2.2 application schematic of a proposed implementation ... intel® quark™ se microcontroller c1000 power sequencing considerations february 2017 application note document number: 335277-002en 7 sequencing. to facilitate this, a load switch with active ... **an-1188 power line communication to send digital data ...** - an-1188 power line communication to send digital data using greenpak™ in this application note, digital data is transferred over ac lines using two silego greenpak slg46620v cmic ic's, along with two kq-330f power line communication modems. the basic ... see full list of application notes. **slg3nt3353 - mouser electronics** - notes: 1. this parameter tracks reference crystal characteristics. ta = 25 °c symbol description conditions min typ max unit vdd operating voltage for vdd 3.0 3.3 3.6 v ivdd 1 v dd current consumption in normal operation vdd = 3.3 v, no load -- 2.0 -- ma notes: 1. average current depends on application and output load. **slg7nt4198 v - static6row** - silego technology, inc. rev 1.0 slg7nt4198_ds_r100 revised march 4, 2014 slg7nt4198_gp_r003 general description silego slg7nt4198v is a low power and small form device. the soc is housed in a 2mm x 2mm tdfn package which is optimal for using with small devices. features low power consumption 3.3v supply **slg7nt128v r100 03292013 - 4donline.ihs** - silego technology, inc. rev 1.0 slg7nt128_ds_r100 revised march 29, 2013 pa02utc0086-01 general description silego slg7nt128v is a low power and small form device. the soc is housed in a 2mm x 2mm tdfn package which is optimal for using with small devices. features • low power consumption • 3.3v supply **qfn40 pdf - wordpress** - qfn40 pdf 40x.qfn40 5x5, 0. qfn40 pdf saw type 40-pin 6mm6mm for 0. qfn40 to dip <http://holtekpdfguide.pdf>. qfn 40 socket saw type 40-pin 6mm6mm for 0. **working with boost converters - ti** - application report snva731-june 2015 working with boost converters frankdestasi abstract this brief note highlights some of the more common pitfalls when using boost regulators. these include maximum achievable output current and voltage, short circuit behavior and basic layout issues. it is **inverter design accurate mains frequency monitor with ...** - accurate mains frequency monitor with calibration an ac power mains utility frequency is typically either 50 hz or 60 hz. the frequency variation is normally restricted to about +/- 1% in most countries. variation occurs usually because of varying load on the grid; a higher load causes the frequency to drop and vice versa. **cs448 isolated channel oscilloscope specification summary** - parameter specification notes input/outputs 16 programmable as in or out logic level programmable 1.8 - 5v all i/o operate at the same logic level control ic silego slg46533v user configurable programmable logic with analog functions resources 24 look up tables (luts) prog oscillator, 25mhz, 2mhz, and 25 khz. prog delay, 3 output **schematics partner technologies - wordpress** - application notes, schematics, sample source code and more. from microcontrollers and processors to sensors, analog ics and connectivity, our technologies are fueling innovation in automotive, consumer, industrial. pulsonix technology partners. cst-logog, cst - computer simulation technology, cst. 3ds_dassaultg what we do. schematic ... **an1183 automatic watering system - eeweb** - in this application note, we'll build an automatic watering system for indoor plants. often, we may be busy and forget to water our plants. ... we built this system using the silego greenpak slg46620v cmic, a small liquid pump, transistors, leds, push buttons, and a buzzer. system tasks the system must water the plant (turn on the pump ...
